

ON-SITE PAINFREE THERAPY

Leveraging the expertise of a national network of care providers, DORN's on-site therapy solutions provide easily accessible pain relief and health improvements for employees who face musculoskeletal disorders and chronic pain. Through 15- to 30-minute hands-on therapy sessions, our specialists provide targeted treatment for job-related aches and pains, helping to improve tissue health and function while engaging directly with your workers.

Equipped with a knowledge of the root causes behind the most common afflictions experienced by workers across a multitude of industries, DORN specialists will work with each individual employee to discover any underlying issues and use custom-tailored therapy techniques to alleviate pain and discomfort. With access to reliable, effective on-site treatment, workers find immediate pain relief for both acute and chronic tissue disorders without having to take time off work.

Therapy sessions are non-OSHA-recordable, allowing employers to keep costs down while workers receive individualized care. Treating pain has wide-ranging effects among workers, helping to improve sleep patterns and minimize fatigue while avoiding the need for any light duty or work restrictions, ensuring that your employees are engaged, productive, and PainFree.

Benefits of PainFree Therapy:

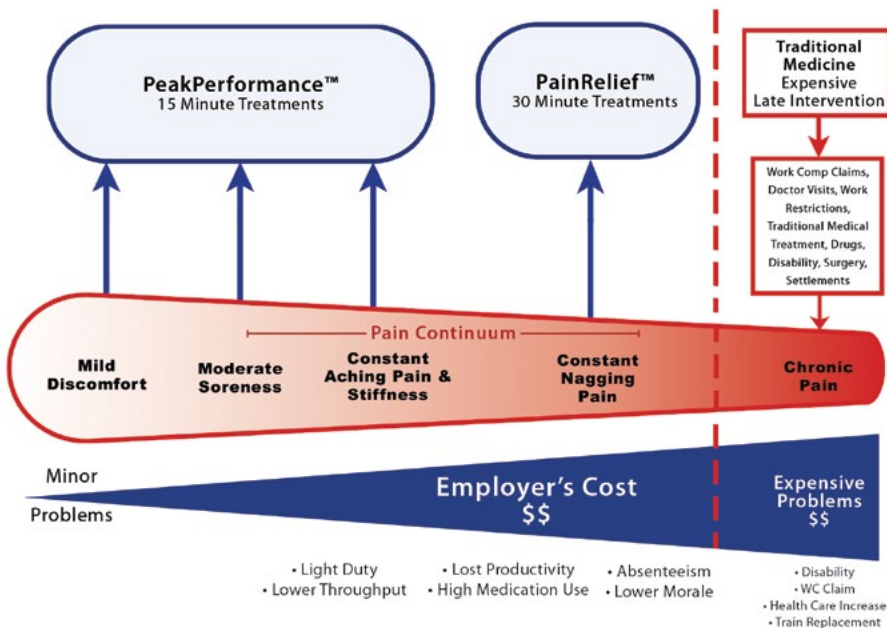

- Major reductions in employee pain levels
- Increased productivity from happier, more effective workers
- Fewer missed work days and lower costs from absenteeism
- Decreased prescription medication usage
- Fewer doctors' visits and workers' comp claims

About DORN Companies

For nearly 20 years, DORN has led the cutting edge of workplace safety solutions, offering holistic, proactive strategies to help organizations in all sectors reduce injuries, cut costs, and boost productivity. With a whole-person approach to safety that evaluates Body, Behavior, and Environment, DORN deploys custom-built solutions based on trusted science and the expertise of a nationwide team of workplace safety specialists. Whether through ergonomic assessments, PainFree treatments, biomechanics programs, technology solutions or coaching and training, DORN solutions significantly enhance organizational efficiency and employee effectiveness while improving the overall culture of the organization. With an annual ROI of nearly 600% and a reach of over 100,000 employees, we have saved employers over \$100 million in workers' compensation and healthcare claims and costs.

PainFree™ Early Intervention = Cost Savings
