

GLOBAL COMPLIANCE AND RISK MITIGATION AT YOUR FINGERTIPS

DORN's EHS Compliance Services ensure your operations meet global standards—proactively, reliably, and without hassle. Our expert compliance team specializes in regulatory reporting, gap analysis, and environmental health and safety oversight across the U.S. and in over 150 countries. Whether you need ongoing monthly programs or support for specific projects, we provide tailored solutions to keep your business compliant and ahead of regulations.

Compliance and Reporting Excellence

Our EHS and legal experts help you stay ahead of regulatory changes with real-time updates, detailed assessments, and actionable reporting. We translate complexity into clarity so that you can make the right moves now. Our services include:

- Regulatory updates with business-specific impact assessments
- Real-time gap analysis to surface vulnerabilities and integrate compliance processes
- Clear outlines of employer and employee responsibilities
- Visual compliance heatmaps across all operational locations
- OSHA audit preparation

We conduct in-depth site evaluations and safety audits to uncover regulatory weaknesses and provide precise, step-by-step action plans to close them quickly, cleanly, and confidently. Our experts provide:

- Comprehensive compliance reviews at local, state, federal, and international levels
- Documentation of relevant statutes and upcoming changes
- Ongoing support to ensure continuous compliance
- Strategic remediation plans tailored to your operations

About DORN Companies

For nearly 25 years, DORN has led the cutting edge of workplace safety solutions, offering holistic, proactive strategies to help organizations in all sectors reduce injuries, cut costs, and boost productivity. With a whole-person approach to safety that evaluates Body, Behavior, and Environment, DORN deploys custom-built solutions based on trusted science and the expertise of a nationwide team of workplace safety specialists. Whether through ergonomic assessments, PainFree treatments, biomechanics programs, technology solutions or coaching and training, DORN solutions significantly enhance organizational efficiency and employee effectiveness while improving the overall culture of the organization. With an annual ROI of nearly 600% and a reach of over 120,000 employees, we have saved employers over \$150 million in workers' compensation and healthcare claims and costs.

Full-spectrum Regulatory Support. Built-in Risk Mitigation.

Staying on top of evolving regulations requires a team of professionals who can adapt quickly across all aspects of EHS compliance. With DORN's Full-Spectrum EHS Compliance model, you'll receive expert support customized to your operations—whether through a flexible monthly plan or on a project-by-project basis.

Regulatory Reporting

Stay informed with real-time updates on regulatory changes, impact assessments, and compliance heatmaps for all operational locations.

EHS Gap Assessment

Our experts analyze your facilities, safety programs, and policies to identify compliance gaps and provide action plans for resolution.

Compliance Support

Following our evaluations, we develop detailed implementation strategies and planning consultations to address compliance gaps with cost-effective solutions.

Health and Safety Foundations

Our team provides ongoing health and safety support to protect your workforce and ensure airtight compliance across offices, production floors, and beyond. Our compliance programs include administrative and engineering-level support for:

- Coordination of safety meetings, emergency response teams, and compliance strategies for inspection and citation mitigation
- Recordkeeping assistance and regulatory documentation management
- Toxic and hazardous substances
- Bloodborne pathogens
- PPE and emergency action plans
- Fire extinguisher maintenance and training
- Fall protection and accident investigation
- Ergonomic assessments and contractor protocols
- Accident investigations
- Contractor safety protocols
- New employee safety orientation

Environmental Foundations

Navigating environmental regulations demands technical expertise and tactical execution. DORN delivers both. We help organizations navigate complex environmental regulations, ensuring compliance with:

- Air quality testing and emissions reporting
- Risk management planning
- Hazardous waste management
- Spill investigation and reporting
- Water quality permits and compliance
